

ADVANTAGES

- An economical solution
- Guaranteed to grow green canopy-grown crow flies, resulting in a hardy, resilient vegetation
- The sedum is extremely drought tolerant and requires little watering
- Easy to use, quick results
- Well adapted to different environmental conditions, including sunny and semi-shaded areas

DIADEM® BUILD-UP

- DiaCutting sedum shoots
- extensive substrate
- VLF-150 separation and filter geotextile
- DiaDrain-25H drainage board
- VLU-300 mechanical protection geotextile
- root-resistant waterproofing membrane
- additional layers

SPECIFICATION

Sedum shoots for scottering, consisting of 6-7 different Sedum species and varieties, trained for special green roof conditions. Proportion of flowering parts: <5%. Required quantity for sowing green roofs: 150-250 g/m². Cannot be stored, must be installed immediately after delivery.

Product: DIADEM® DiaCutting
Producer's certificate: A.P.P. Kft.
Website: www.diadem.com

TECHNICAL DATA

Sedum species, number of species (pc):	6 - 7*
Shoot length (cm):	1-5
Required quantity (g/m ²):	150-250
Proportion of flowering parts (%):	<5
Delivery:	in sacks
Storage:	cannot be stored, must be installed immediately after delivery

*As a result of changes in climatic conditions, 1 or 2 of the species planted may become dominant, while some species may disappear.

Distribution of sedum varieties planted:

Sedum Hispanicum: 80%
Sedum Album: 10%
Sedum Acre Golden Carpet: 5%
Sedum Sexangulare: 5%
