SPECIFICATION

The DiaGrid-Gravel 33 mm is a heavy-duty gravel grid made from recycled plastic, designed to stabilize gravel and crushed stone surfaces while maintaining their natural permeability. It is ideal for parking areas, driveways, walkways, or garden paths where a durable yet aesthetically pleasing surface is required. Thanks to its modular click-lock system, installation is quick and easy, while preventing gravel displacement and the formation of ruts. The product is UV- and frost-resistant and provides reliable stability even under high loads.
